

NSW - EVIDENCE OF IDENTITY GUIDE

The combination of documents presented to the SafeWork NSW accredited assessor must include your date of birth, current residential address, photograph and signature.

HRW – Residential Address **MUST be in NSW**

TCWT – Training and assessment **MUST be in NSW**, address may be interstate

Documents provided must be original. Certified copies cannot be accepted.

Primary documents	Point value
(Note: only one primary document can be provided)	70pts
Australian Birth Certificate/card issued by the Registrar of Births Deaths and Marriages	70pts
Passport – Australian or international (current or expired within last two years, but not cancelled)	70pts
Australian citizenship certificate	70pts
Secondary documents	40pts
Current Australian driver's licence/learner driver's licence/permit **	40pts
Current Australian boat operator's photo licence **	40pts
Current NSW firearms photo licence	40pts
Current Australian issued high risk work photo licence **	40pts
Current state/territory proof of age or photo card (eg. a RMS issued photo card) **	40pts
Australian defence or Police photo ID card	40pts
Department of Veterans Affairs card	25pts
Current Centrelink card **	25pts
Property (council) rates notice issued in the last three (3) months	25pts
Property lease agreement	25pts
Home insurance document	25pts
Utility bills issued in the last three (3) months – for example water, electricity, gas **	25pts
Telephone account issued in the last three (3) months **	25pts
Current Medicare card **	25pts
Current motor vehicle registration or insurance document ** (TCWT allows both documents at 25pts each)	25pts
Credit/savings cards/bank statements (2 diff banks acceptable, for a 50pt total) **	25pts

FOR HRW ASSESSMENTS ONLY - For inmates of a correctional centre an arrangement exists to accept additional forms of EOI as listed below. This additional EOI applies to correctional centre inmates who are being assessed in a correctional facility under this arrangement **ONLY**.

Correctional centre inmate master index number photo card	40pts
Correctional centre inmate master index number card	5pts
Letter of verification from the department of corrective services	25pts

** **DIGITAL copies** can only be accepted if the document is:

- o within the Service NSW official app OR
- o within the MyGov official app OR
- o able to be verified as having been issued by the bank/utility (eg – on their website etc)
- You may only use one primary (70pts) document.
- You do not have to provide a primary document. You may use a combination of secondary documents.
- If you provide more than one credit card, savings account card or statement, they must be from different financial institutions.
- If you provide more than one utility bill, they must be from different utility providers.
- All documents provided must contain your name in full, not just your initials.
- NOTE: An ImmiCard is NOT accepted for EOI

Be sure to have the correct original 100 points of ID

Assessment times may vary

Assessment:

The assessment is made up into three parts

Part 1: Theory: Written (English) 61 questions, that require 95% pass rate.

Part 2: Calculations: 9 questions that are all requiring a 100% pass mark.

Part 3: Performance (Driving test) is made up of 5 parts.

1. Hazard Identification & risk control, you will be required to identify multiple hazards that are in the warehouse and possible hazards that are not present but can be hazardous to forklift drivers in other workplaces. Risk control: you will need identify examples of appropriate controls used in the current warehouse and relevant safety procedures like SWMS
2. Pre start check (Visual inspection)
Walk around the forklift identifying both physically and verbally all the appropriate checks including locating and verbally clarifying your understanding of the data plate, checks regarding fluid levels can just be described verbally.
3. Startup checks, physically and verbally perform all required checks including all mast controls, brakes steering etc.
4. Shifting loads, you will be required to move various loads at various heights in the safest and appropriate manner, ensuring things like keeping mast vertical (forks level) when lifting and lowering loads (self-leveller can be used). Always checking over both shoulders prior to reversing ensuring load is up against the heels and kept below axle level at when travelling.
5. Shut down & securing, ensuring that forklift is parked appropriately with tips down touching ground, hand brake & neutral engaged and a post operational check (Basic) is performed.

Appeal: If you do not agree with your final result you can lodge a complaint with the RTO (training centre) which will be reviewed accordingly. Alternatively, this can be done directly to ***State Regulator** (*SafeWork NSW) within 14 days

Post Training Activity Book

To be completed before you do your HRW Assessment

1.	When should a forklift be checked for damage? <i>When a fault is suspected</i> <i>Before use (Pre-start check), After use (Post-operational check), Regularly during operation</i>
2.	List 6 items that you should check when undertaking a pre operational check of the Forklift? A <i>Forks and attachments (for wear, cracks or damage)</i> B <i>Hydraulic system (leaks, hoses, and cylinders)</i> C <i>Tyres (pressure, wear, or damage)</i> D <i>Brakes and steering (functionality check)</i> E <i>Warning devices (horn, lights, alarms)</i> F <i>Fluid levels (fuel, oil, coolant, and brake fluid)</i>
3.	List 6 start-up checks that should be made before operating the FORKLIFT? A <i>Seat belt and safety restraints are secure</i> B <i>Engine start-up (smooth operation, no unusual noises)</i> C <i>Test brakes (hand and foot brakes)</i> D <i>Check lifting and lowering mechanism</i> E <i>Ensure controls respond correctly</i> F <i>Verify warning lights and indicators function</i>
4.	Why is it important to communicate with workplace personnel before commencing work on site? <i>to ensure awareness of forklift operations to prevent accidents or collisions</i> <i>to identify potential hazards to follow site specific safety procedures</i>
5.	List 6 methods of communication can be used in the workplace? A _____ B _____ C _____ D _____ E _____ F _____
6.	If you are given unclear information about your work, what should you do?
7.	Before commencing work who should you consult with?
8.	Are you allowed to use a forklift that has a missing data plate?
9.	What action should you take if you find that data plate is missing from forklift?
10.	What does hazard mean?

11.	List 6 site hazards and 6 non site hazards in the following table		
	6 Site hazards	6 NON Site hazards	
	A	A	
	B	B	
	C	C	
	D	D	
	E	E	
	F	F	
12.	What does risk mean?		
13.	What is the risk of refuelling while the engine is running?		
14.	Describe which way a loaded forklift should travel up a ramp and where your load should be facing.		
15.	What might occur if you attempt to turn a FORKLIFT while on a ramp or sloping surface?		
16.	How high should your load be raised when travelling?		
17.	When should hazard controls be applied?		
18.	Why is it unsafe to operate a FORKLIFT with the load raised?		

19.	What should be provided for the gap between a truck and the loading dock before shifting the load?	
20.	A pallet contains an unbalanced load with one end heavier than the other, which end should be against the heel of the fork arms?	
21.	If a pallet appears to be unsafely stacked, what would you do before lifting it?	
22.	What should you do if you have to work closer than the minimum distances required when working near power lines?	
23.	List 2 things used to make power lines more visible? A _____ B _____	
24.	How can you find out what voltages the overhead power lines are?	
25.	What should you do if you drive into and make contact with power lines?	
26.	Why is it dangerous to operate internal combustion engines in restricted/confined spaces?	
27.	Why must batteries be charged in well ventilated areas?	
28.	What would be the best FORKLIFT to use in confined spaces?	

29.	Why should you constantly monitor the load movement when operating the forklift?	
30.	List 3 control measures that you can apply for pedestrians, site personnel and vehicles or mobile equipment? A _____ B _____ C _____	
31.	What must you have when working at night or in dark areas?	
32.	What precautions can you take when operating on wet and slippery surfaces?	
33.	Why should you not raise or lower a load near or over people?	
34.	Is it permissible to carry a load with one fork arm? B Why?	
35.	Is it permissible to carry passengers on a FORKLIFT? B Why?	
36.	How does attachment affect the capacity of the FORKLIFT?	
37.	What can happen if the load is not hard up against the heel of the fork arms?	

38. How could you determine the weight of a load?

A _____

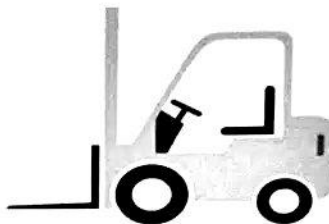

B _____

C _____

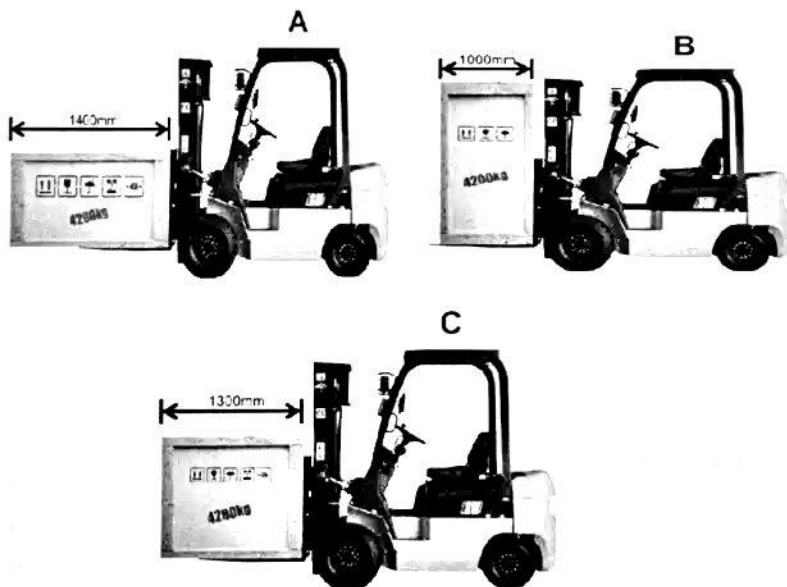

39. What should you do if a FORKLIFT is tipping over and you are inside the forklift?

40. Where is the fulcrum (point of balance) on the forklift?

Indicate on this diagram

41. Look at the following, which load is within the capacity of the forklift rated at 4200kg at 600mm

42.	Where is the Load Centre Distance? Indicate in the diagram below 	
43.	List 5 reasons a FORKLIFT may tip forwards. A _____ B _____ C _____ D _____ E _____	
44.	List 5 reasons a forklift may tip sideways. A _____ B _____ C _____ D _____ E _____	
45.	Why should a side shift attachment be centralised before travelling with a load?	
46.	When using a different attachment, how will it affect the forklift?	
47.	List 3 locations where you must not park a FORKLIFT. A _____ B _____ C _____	
48.	Why should you remove the keys from a FORKLIFT after use?	
49.	What should you do if you notice a defect and/or damage to the FORKLIFT?	

50. List 3 things you should consider when parking the FORKLIFT.

A _____
B _____
C _____

51. What is your duty of care as a HRW operator?

52. List 3 things an employer can do to ensure the health and safety of workers.

A _____
B _____
C _____

53. List 3 sources where you can find information about health and safety.

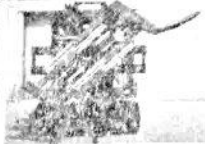

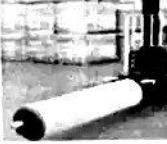

A _____
B _____
C _____

54. How can HRW operator be penalised if they fail to operate the forklift safely?

55. What should you check on wheels and tyres?

56. If you are driving with a large load and your view is **obstructed**, what should you do?

57. Name the following attachments using the table below

Bale clamp	Jib	Rotators	Drum carrier
Carpet spike	Paper roll clamps	Slippers	Work platform
			
			

58 How can a weather report help you at work?

Part 2

Calculation Activity

At times, you may be required to calculate the weight of a load to ensure the load is within the lifting capacity of the forklift. Try the calculation exercises below.

You must to show your calculations

Read all the information carefully and double check your answers.

1. You have 4 steel drums of water. Each drum weighs 212kg and are on a pallet weighing 45kg, what is the total weight of this load?

2. There are 6 cartons per layer and 6 layers on a pallet, each carton weighs 36kg.

The load is placed on a pallet weighing 40kg, what is the total weight of this load?

3. A load contains 56 boxes each box weighs 33kg placed on a pallet weighing 42kg, what is the total weight of this load?

**WARNING**

Trained Operators and Mechanics Only

Read Operating Manual located on seat or in operator's compartment

Failure to follow operating, inspection, and maintenance instruction can cause serious injury or death!

CAPACITY WITH MAST VERTICAL AND EQUIPPED AS SHOWN

Lift Truck Model GDLRAIS155KXH123
Serial No ABXYZ14325

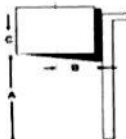

Attachment 1981 mm (78in) Carriage + Sideshifting Fork Positioner NMHG
70L-FPS-c205 + 1830 mm Forks

Truck Weight 9750 kg
Tread Width 1844 mm
Back Tilt 10.0 Degrees

Tyre Size Front 8.25-15/14-PLY Dual Pneu
Pressure 800 KPA (116 PSI)

Rear 8.25-15/14-PLY Dual Pneu
800 KPA (116 PSI)

MAXIMUM CAPACITY	Load Height Dim. A	Load Centre	
		Dim. B	Dim. C
6130 kg	4400 mm	915 mm	915 mm
0 kg	0 mm	0 mm	0 mm

Use the data plate above to answer the following questions

		Answer	Show calculations here
5	Can you lift a pallet 1175mm length and 11750mm width with the height of 1600mm and a total weight of 1700kg?	YES/NO	
6	A container containing 6000kg load. Note: The tare weight on the container is 2500kg. The container size is 2.4m wide, 2.5m high and 2.4m long?	YES/NO	
7	What is the maximum height a load can be raised with the mast in the vertical position?	YES/NO
