

LICENCE TO OPERATE A FORKLIFT TRUCK QUIZ

NAME: _____ DATE: _____

LICENCES 4
WORK

version 1

Quiz

Released - October 2020

review - October 2022

2

1. When should a forklift be checked for damage?
2. List 7 items that you should check when undertaking a pre operational check of the FORKLIFT?
3. List all guards on your Forklift and their functions.
4. List 6 post start checks that should be made after starting and before operating the FORKLIFT?
5. Why is it important to communicate with workplace personnel before commencing work on site?
6. List 5 methods of communication can be used in the workplace while operating your forklift
7. If you are given unclear information about you work, what should you do?
8. Before commencing work who should you consult with?
9. Are you allowed to use a forklift that has a missing data plate?
10. What action should you take if you find that data plate is missing from forklift?

11. What does hazard mean?

12. List 6 site hazards and 6 non site hazards in the following table

Site hazard	Other than site hazards (non hazards)

13. What does risk mean

14. What is the risk of refuelling while the engine is running?

15. Describe which way a loaded forklift should travel up a ramp and where your load should be facing.

16. What might occur if you attempt to turn a FORKLIFT while on a ramp or sloping surface?

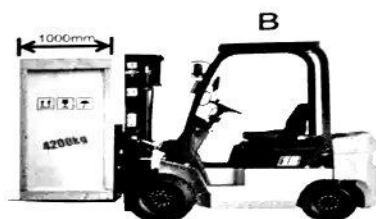

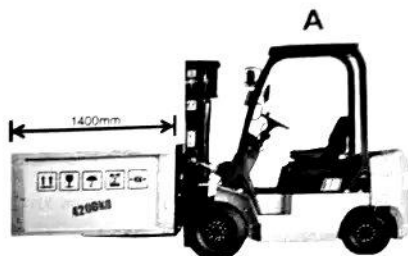

17. How high should your load be raised when travelling?

18. When should hazard controls be applied?

19. Why is it unsafe to operate a FORKLIFT with the load raised?
20. What should be provided for the gap between a truck and the loading dock before shifting the load?
21. A pallet contains an unbalanced load with one end heavier than the other, which end should be against the heel of the fork arms?
22. If a pallet appears to be unsafely stacked, what would you do before lifting it?
23. Why rear end swing dangerous?
24. What should you consider when stacking items on top of each other?
25. What is the minimum distance you should keep away from power lines?
26. What should you do if you have to work closer than the minimum distances required when working near power lines?
27. What is used to make power lines more visible?
List 2
28. Do Tiger Tails insulate the power lines?
yes, or no?
29. How can you find out what voltages the overhead power lines are?
30. What should you do if you drive into and make contact with power lines? List 6
31. Why is it dangerous to operate internal combustion engines in restricted/confined spaces?
32. Why must batteries be charged in well ventilated areas?
33. What would be a safer FORKLIFT to use in confined spaces?
34. Why should you constantly monitor the load movement when operating the forklift?
35. List 3 control measures you can apply for pedestrians, site personnel and vehicles or mobile equipment?
36. List the things that you should do in the event of steering, hydraulic or brake failure on a forklift.
37. What must you have when working at night or in dark areas?

38. What precautions can you take when operating on wet and slippery surfaces?
39. Why should you not raise or lower a load near or over people?
40. Is it permissible to carry a load with one fork arm and why? List 2 reasons
41. Is it permissible to carry passengers on a FORKLIFT and why?
42. How does increasing the load centre affect the capacity of the FORKLIFT?
43. What can happen if the load is not hard up against the heel of the fork arms?
44. Are you allowed to add additional counterweights without referring to the manufacturer?
45. How could you determine the weight of a load?
46. What should you do if a FORKLIFT is tipping over?

47. Look at the following, which load is within the capacity of the forklift rated at 4200kg at 600mm

48. List 5 causes of tipping forklift sideways?
- a)
 - b)
 - c)
 - d)
 - e)
49. List 5 causes of tipping FORKLIFT forwards?
- a)
 - b)
 - c)
 - d)
 - e)

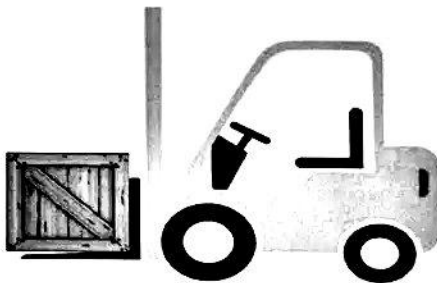

50. Why should a side shift attachment be centralised before travelling with a load?
51. Why should you wear seatbelt?
52. Name 3 locations where you will not park a FORKLIFT?
53. Why should you remove the keys from a FORKLIFT after use?
54. List 3 things you should consider when parking the FORKLIFT
- a)
 - b)
 - c)
55. What is your duty of care as a HRW operator?
56. What can an employer do to ensure the health and safety of workers?

57. Where can you find information about health and safety.

58. How can HRW operator be penalised if they fail to operate the forklift safely?

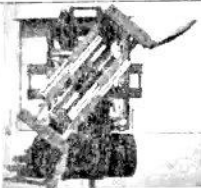

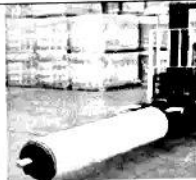

59. If you're driving with a large load where your view is obstructed what should you do?

60. Using triangle ▲ Indicate in the diagram below where the fulcrum is and a horizontal and vertical line _____ for the load centre distance

1. Ensure you identify the SWL of the hooks	2. Driver must remain in the forklift operators seat	3. Ensure you have accessed and read the SDS before attempting to lift	4. Ensure you plan your path for a sufficient turning space
5. Can be used to lift paper rolls	6. Ensure that you have sufficient ground clearance when rotating	7. The forklift should be driven backwards	8. Must never be more than 1.5 times the length of the original forks

61. Using the table above, Name the following attachments and List one safety consideration.
(K.E.13)

62. List six (6) unplanned and /or unsafe environmental/weather conditions. (K.E.8)

63. Least 2 things that your employer need to provide you prior to undertaking work on unfamiliar forklift.

64. How does the Jib attachment effect your forklift?

65. What is the most common load centre in mm?

66. How does obtaining the weather forecasts help you?

67. Tick (✓) nine (9) work area operating surface/ground conditions that may affect the safe operation and stability of the forklift truck. (K.E.19)

1. Backfilled ground		2. Potholes	
3. Damaged cracked bitumen		4. Railway tracks	
5. Damaged cracked concrete		6. Rough uneven surface	
7. Soft soil		8. Sloping surface	
9. Trench covers/grates		10. Hard compacted soil	
11. Firm level site		12. Smooth concrete floor slab	

68. Name the following methods of traffic management (K.E.16)

- A High Impact Barrier
- B Temporary Barriers
- C Vehicle route/Guardrail and gates
- D Overhead Walkways
- E Bollards and marked walkways
